

Stainless Steel Flex Rod Handle

Series 5351

Hanging Hole

The hanging hole allows for easy storage that lets the brush drain

Strong and Flexible

Stainless steel flexible rod guides tube brushes through pipes

Easy Connection

End-piece easily connects with tube brushes or the Extension Rod 5346 to increase the length of the brushes

This flexible rod is designed with a special screw-in thread for use for tube cleaner brushes, part numbers 5354, 5356, 5365, 5368, and 5391. The rod can be extended by 30 inch increments by attaching part number 5346. The flexibility is ideal for adjusting to clean curved pipes, such as sight-glasses on large tanks and hoses used for transferring liquids from one tank to another.

Stainless Steel Flex Rod Handle

5351

Use with any compatible tube brush to clean out pipes and drains. Get the ultimate in flexibility by combining it with part number 5346 to increase its length in 30" increments. The stainless steel is FDA-compliant, durable, and flexible.

The Color-Coding System

Remco and Vikan® brands offer an integrated color-coding system to help mitigate the risk of cross-contamination in food processing facilities. With an array of color-coded tools and storage brackets, and years of experience building effective color-coding systems, the experts at Remco Products Corporation can help you effectively apply color-coding to divide and identify different zones or processing tasks. As a result, workers can more easily comply with material handling and hygienic cleaning procedures to maintain stringent food safety standards.

Please see the full-line catalog for a complete list of Remco™ and Vikan® products.
