

# Low Undercarriage

Series 6904

**REMCO**

## Durable Frame

The minimal steel construction makes this undercarriage a nimble yet durable transporting solution

## Caster Wheels

These wheels don't get caught or seize, even when rolling through meat fat

This galvanized steel low undercarriage features castor wheels that are impervious to meat fat and bearings equipped with grease fittings. Use a low undercarriage when mobility is required, but tipping is not necessary. This tub accessory meets all USDA specifications and is commonly used for meat, seafood, poultry, commercial fishing, confectionery, bakery, and grain applications. Replacement casters and wheels are available.

## Low Undercarriage

6904

Available in steel only

This tub accessory is an economical solution for easily moving carts on floors that may be covered in animal grease or debris. The steel construction means the undercarriage will last even when exposed to the chemicals and substances commonly used in processing plants.

### Specifications:

## The Color-Coding System

Remco and Vikan® brands offer an integrated color-coding system to help mitigate the risk of cross-contamination in food processing facilities. With an array of color-coded tools and storage brackets, and years of experience building effective color-coding systems, the experts at Remco Products Corporation can help you effectively apply color-coding to divide and identify different zones or processing tasks. As a result, workers can more easily comply with material handling and hygienic cleaning procedures to maintain stringent food safety standards.
