

Nylon Flex Rod Handle

Series 53525

Tube Brush Connector

Fits with compatible tube brush heads to clean curved pipes

Ultra-Flexible Nylon

Nylon is flexible enough to gently clean glass pipes and tubes without causing strain

Easy-Grip Handle

Polypropylene handle is sturdy and food-safe

This nylon flexible handle is used with a tube brush for cleaning around sensitive areas such as glass, and its flexibility allows it to follow curved pipes. The handle combines with tube cleaners, part numbers 5354, 5356, 5365, 5368, and 5391 to deliver the ultimate flexibility in cleaning.

Nylon Flex Rod Handle

53525

Glass pipes and tubes require extra-flexible handles to provide a gentle clean. Nylon is flexible enough to meet these standards, yet versatile enough to also be used with metal pipes and tubes, too, when combined with our selection of compatible tube brushes.

The Color-Coding System

Remco and Vikan® brands offer an integrated color-coding system to help mitigate the risk of cross-contamination in food processing facilities. With an array of color-coded tools and storage brackets, and years of experience building effective color-coding systems, the experts at Remco Products Corporation can help you effectively apply color-coding to divide and identify different zones or processing tasks. As a result, workers can more easily comply with material handling and hygienic cleaning procedures to maintain stringent food safety standards.
