

Ergonomic Shovel - Large Blade

Series 5601

Easy-Grip Handle

Wide handle with opening is ideal both for worker comfort and as a storage method

Reinforced Ergonomic Handle

Handle contains an aluminum tube to increase its durability, and is stepped in two places to make it ergonomically friendly

Large Blade

Long and wide blade makes this ideal for shovelling large volumes

This robust ergonomic shovel is designed for use in direct contact with food. The handle is reinforced with an inner aluminum tube. It is stepped in two places which helps to prevent back injuries. The neck joint has been strengthened in order to withstand heavy-duty use. The long and large blade combination makes it suitable for shoveling large volumes.

Ergonomic Shovel - Large Blade

5601

This hygienically designed shovel is easy to clean and ideally suited for moving large amounts of food product. The handle is reinforced with an aluminum tube and stepped twice to help workers avoid back injuries.

The Color-Coding System

Remco and Vikan® brands offer an integrated color-coding system to help mitigate the risk of cross-contamination in food processing facilities. With an array of color-coded tools and storage brackets, and years of experience building effective color-coding systems, the experts at Remco Products Corporation can help you effectively apply color-coding to divide and identify different zones or processing tasks. As a result, workers can more easily comply with material handling and hygienic cleaning procedures to maintain stringent food safety standards.

Please see the full-line catalog for a complete list of Remco™ and Vikan® products.
