

Ergonomic Shovel - Small Blade

Series 5611

Easy-Grip Handle

Wide handle with opening is ideal both for worker comfort and as a storage method

Reinforced Ergonomic Handle

Handle contains an aluminum tube to increase its durability, and is stepped in two places to make it ergonomically friendly

Long Blade

Slim blade is long enough to reach into deep containers to shovel smaller volumes

This robust ergonomic shovel is designed for direct contact with food. The handle is reinforced with an inner aluminum tube. It is stepped in two places to help prevent back injuries. The neck joint has been strengthened with an aluminum tube in order to withstand heavy-duty use. The long and small blade combination makes it suitable for shoveling smaller volumes and reaching into deep containers.

Ergonomic Shovel - Small Blade

5611

The hygienically designed Small Blade Shovel doesn't contain any sharp corners or deep recesses, making it easy to clean. The ergonomic steps in the handle help prevent back injuries and make the shovel easier for employees to use.

The Color-Coding System

Remco and Vikan® brands offer an integrated color-coding system to help mitigate the risk of cross-contamination in food processing facilities. With an array of color-coded tools and storage brackets, and years of experience building effective color-coding systems, the experts at Remco Products Corporation can help you effectively apply color-coding to divide and identify different zones or processing tasks. As a result, workers can more easily comply with material handling and hygienic cleaning procedures to maintain stringent food safety standards.
