

5 Gallon Bucket Lid

Series 5693

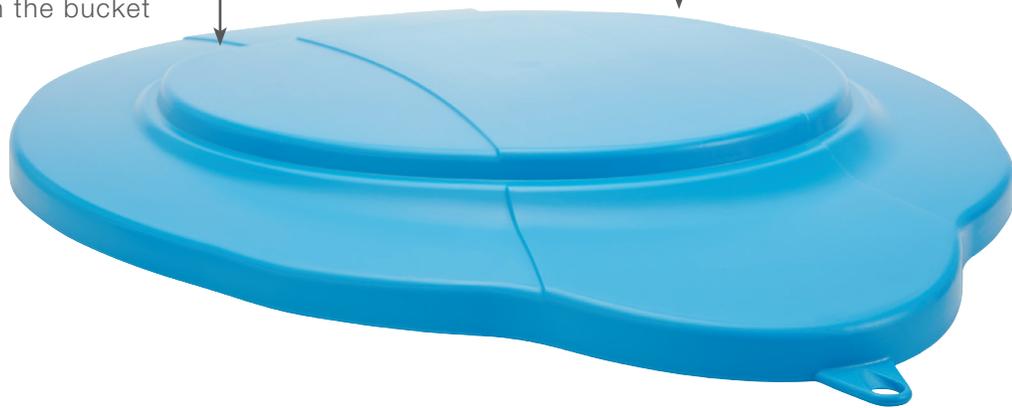

Clip System

Lid snaps in place to keep it tightly secure on the bucket

Stackable Design

Molded lid facilitates stacking multiple buckets (5692) on top of each other

Hanging Hole

Hanging hole allows for easy storage, and teardrop design lets water drain easily

This bucket lid is useful for preventing materials from spilling or becoming spoiled during storage or transport. It has a clip system for securing the lid tightly. The lid design allows for the 5 gallon bucket (5692) to be stacked to save space and turn the bucket into a durable and secure storage system.

5 Gallon Bucket Lid

5693

The 5 Gallon Bucket Lid corresponds with bucket (5692) to prevent spills and turn the bucket into a safe means of storage and transport. The lid is molded to allow the buckets to stack, and the hanging hole provides an easy storage solution.

The Color-Coding System

Remco and Vikan® brands offer an integrated color-coding system to help mitigate the risk of cross-contamination in food processing facilities. With an array of color-coded tools and storage brackets, and years of experience building effective color-coding systems, the experts at Remco Products Corporation can help you effectively apply color-coding to divide and identify different zones or processing tasks. As a result, workers can more easily comply with material handling and hygienic cleaning procedures to maintain stringent food safety standards.
