

One-Piece Industrial Regrind Shovel

Series 6981RG

REMCO

Lightweight

Promotes comfort for users performing repetitive tasks.

One-Piece Construction

Eliminates points of weakness where two-piece tools may fail.

Shorter Length

Ideal for applications involving raised surfaces or containers.

Durable Plastic Blade

Bears a considerable load, but will not cause damage to surfaces or paint.

This polypropylene industrial shovel is a lightweight alternative to metal shovels that will not scratch or mar surfaces.

One-Piece Industrial Regrind Shovel

6981RG

■ Gray

This Remco one-piece polypropylene shovel is tough and lightweight. With a regrind additive, it is a cost-effective option for industrial applications that do not require food grade materials.

The Color-Coding System

Remco and Vikan® brands offer an integrated color-coding system to help mitigate the risk of cross-contamination in food processing facilities. With an array of color-coded tools and storage brackets, and years of experience building effective color-coding systems, the experts at Remco Products Corporation can help you effectively apply color-coding to divide and identify different zones or processing tasks. As a result, workers can more easily comply with material handling and hygienic cleaning procedures to maintain stringent food safety standards.

Please see the full-line catalog for a complete list of Remco™ and Vikan® products.
