

Grout Brush

Series 7040

Dismountable swivel feature

Dismountable thread adapter to allow easy cleaning of swivel thread feature

180° Pivot

The head of the grout brush pivots 180°, making cleaning possible almost everywhere

Angle Cut Bristles

The combination of stiffer bristles down the middle of the brush and the angled cut, allows for cleaning even in the most narrow crevices

This brush is excellent for scrubbing in difficult to reach areas or areas where you only have limited space. The grout brush is suitable for cleaning under equipment, between equipment, getting into corners, cleaning the crevices between floors and walls.

Grout Brush

7040

The crevice scrub, with extra stiff angle cut bristles, is great for cleaning grout and other difficult areas. It is mounted with a thread adaptor that can be removed for easy cleaning of the whole product. The neck allows for 180° of rotation, great for reaching under equipment.

The Color-Coding System

Remco and Vikan® brands offer an integrated color-coding system to help mitigate the risk of cross-contamination in food processing facilities. With an array of color-coded tools and storage brackets, and years of experience building effective color-coding systems, the experts at Remco Products Corporation can help you effectively apply color-coding to divide and identify different zones or processing tasks. As a result, workers can more easily comply with material handling and hygienic cleaning procedures to maintain stringent food safety standards.

Please see the full-line catalog for a complete list of Remco™ and Vikan® products.
